## PUBLICATIONS

In recent years, my laboratory has made all data, materials, and code for published studies as widely available as possible (accessible from our Lab OSF page: <https://osf.io/n4r8p/>). Studies for which I or one of my students are lead author typically have been preregistered, and we have begun using registered reports for new studies when feasible (i.e., submitting a results-blind manuscript for review, along with all code and materials, prior to data collection). Published, accepted, or provisionally accepted registered reports are indicated with **RR** below. A provisionally accepted Stage-1 registered report has been peer reviewed prior to conducting the study, with guaranteed publication regardless of outcome (provided that we adhere to the plan specified in the stage-1 manuscript).
